P-Series Feed Bins

The Coperion K-Tron feed bin or bag dump stations are used to pre-condition the material for vacuum conveying before it enters the air stream.

Feed bins are mostly positioned underneath bulk bag unloading stations or other process machinery, in order to buffer material for big bag change-over or for other purposes. The Coperion K-Tron P-Series Feed Bin and Bag Dump Stations are constructed out of stainless steel providing easy clean up. The modular structure allows for upgrades from a feed bin to a bag dump station. The integration of fully fluidized cone eliminates flow problems. The bag dump station dust hoods come with vents for adaptation to central dust collection systems, as well as bag rest and easy opening hatch. An alternative bottom pick-up allows for washing and draining the feed bin.

FEATURES

- 316L [1.4404] stainless steel construction
- Gaskets, natural rubber white, food grade, FDA listed
- Crack and crevice free welds, ground smooth, polished
- Electropolish surface finish
- 50 or 150 liter [1.8 or 5.3 ft³] working volume
- Vent to central dust extraction 152.4 mm [6 in] OD
- Fully fluidized cones made of sintered PORVAIR, FDA listed
- Aeration pads
- Vibrator
- Level probes
- Solenoid valves 24 VDC
- Casters
- ATEX category 3D or 2 GD or US NEC Standard Class I Div. 2 or Class II Div. 2
