Batch Weigh Vacuum Receivers

The Coperion K-Tron Conveyor/Weigher package combines a vacuum receiver with a reliable weighing system.

Batch Weigh Vacuum Receiver allows multiple ingredients to be conveyed and weighed so that accurate batching of ingredients can take place on either a cumulative or sequential basis.

As a Multi Material Batch Weigher the unit accumulates an exact amount by weight of several ingredients (generally a maximum of eight ingredients) to form a batch prior to loading a mixer.

As a Totalizing Weigher the unit continuously monitors the throughput of a single material in a process or accurately fills a bulk container.

DESIGN FEATURES AND OPTIONS:

The batch accuracy is within $\pm 0.5\%$ of full scale capacity. The receiver is constructed 316L stainless steel with an Electropolished surface finish. The weighing frame is constructed out of mild steel or SST 304. The gaskets and seals are FDA compliant food quality. Options include level sensors, discharge aids and hazardous area version.
